

Hematology-Oncology Associates of CNY

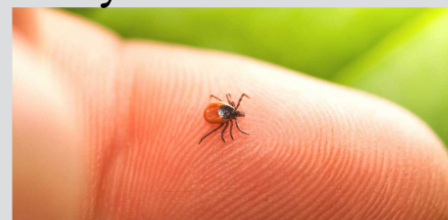

Personalized cancer care –
when you need us, where you need us.

Thank you for trusting us with your care
since 1982!

Preventing Lyme Disease

- Stay clear of grassy or wooded areas, especially from May to July.
- Cover exposed skin and your scalp in possible tick-infested areas.
- Apply a DEET-based insect repellent to your skin.
- Apply an insect repellent with permethrin to your clothes, **but never on your skin.**
- After spending time outside, carefully inspect yourself and pets for ticks.
- Wash your skin and scalp to get rid of any loosely attached ticks.

HOA BUZZ WORDS

“Social determinants of health” --
The nonmedical factors that influence health — things like your income, race, gender, education, where you live, how available healthcare is in your community, etc.

THANK YOU FOR ANSWERING OUR SURVEY!

85% of respondents said they want to receive our newsletter once each month.
