Thank you to Mr. Bennie Duckett for throwing out the first pitch.

The Doubledays players love supporting our cancer survivors!

**New Multiple Cancer Early-Detection Testing Gets Ahead of Cancer When it's Most Treatable!**

Finding cancer early creates the best chance for successful treatment.

HOA now offers the [Galleri® multi-cancer early detection test](#). In a clinical study the test detected a signal shared by more than 50 types of cancer, including many, like ovarian and pancreatic cancers, not commonly screened for today.

With a simple blood draw, the Galleri test can provide early detection insights that help you to be proactive about your health.

This is a revolutionary way to look for a signal associated with active cancer!

**How to take the Galleri test?**

Galleri is recommended for use in adults aged 50 or older who have a current primary care physician, and have been cancer-free for three or more years.

The test is not covered by insurance, but generally qualifies for HSA and FSA accounts. The cost of the test is \$1,499 - with \$949 paid to Galleri and \$550 paid to HOA for two visits, including the blood draw.

Galleri should be used in addition to healthcare provider recommended screening tests.

**Fighting for oncology patients with**

We continually work with our partners at the [Community Oncology Alliance](#) to fight for our patients. A current focus is making certain cancer patients receive their medications within 72 hours!

**PROBLEM:**

Patients with cancer and other serious diseases all too often experience unacceptable delays by pharmacy benefit managers (PBMs) and insurers.

**SOLUTION:**

The bipartisan Timely Access to Clinical Treatment Act of 2023 (TACT Act). The intent of the TACT Act is to ensure that patients with cancer and other serious diseases don't face delays in getting their oral drugs when PBMs and insurers mandate use of their corporate mail-order pharmacies.
